Sindh, Pakistan. Open to remote work and relocation.

Summary

IT infrastructure engineer and web developer working in IT since 2019. I look after servers, cloud systems and company IT, and I build the web apps that run on them. I mostly work with React, Node.js, Python and Linux.

Skills

Infrastructure: Linux, Google Cloud (Compute Engine, Load Balancing), Microsoft 365, CI/CD, PM2

Languages: JavaScript, TypeScript, Python

Frontend: React, Next.js, responsive design, accessibility basics

Backend: Node.js, Express.js, REST APIs, JWT login, webhooks, Socket.IO

Data and services: MySQL / MariaDB, Stripe, PayPal, WhatsApp APIs, OpenAI and Gemini APIs

Experience

Asico Real Estate LLC

IT Infrastructure Engineer

Dubai, UAE (Remote)

Oct 2024 to Present

- Manage the company servers and cloud setup on Google Cloud and Linux.
- Build and maintain internal and customer-facing web apps, from requirements to deployment.
- Add AI features where they help, keeping them fast, reliable and easy to maintain.
- Reuse components, keep API patterns consistent and fix production issues to help the team ship faster.

Pak Affairs

Web Developer

Islamabad, Pakistan

Jan 2023 to Feb 2024

- Built web features from start to finish.
- Fixed production issues and improved stability by refactoring code and fixing bugs.

ACT Group (Wind Power Plant)

Remote Monitoring and Control Specialist

Thatta, Sindh, Pakistan

Jun 2020 to Dec 2022

- Monitored wind turbines in real time and analysed performance trends.
- Coordinated maintenance work in an environment where reliability matters.

Federal Investigation Agency (FIA), NR3C Cyber Crime Wing

Intern

Islamabad, Pakistan

Sep 2019 to Nov 2019

- Helped test web applications for security problems and sort small incidents.
- Learned the basics of threat research and malware analysis.

Selected Projects

ASICO WhatsApp Bot (Node.js, Express, MySQL, Socket.IO)

- A WhatsApp Business CRM for automation and customer support, with an inbox, workflows and live updates.
- Connects to the WhatsApp Cloud API (webhooks) and WhatsApp Web sessions, with token-secured REST endpoints and AI-assisted replies.

RealEstateApp AE (Angular 17, TypeScript)

- A property management platform with an AI agent, WhatsApp automation, CRM and leasing.

PropertyApp Lite (JavaScript)

- Property management covering the full leasing process for UAE real estate.

ASICO Signature Generator (HTML, CSS, JavaScript)

- An internal tool that creates branded English and Arabic email signatures.

Interactive Resume (this portfolio) (React, Three.js, GSAP)

- A 3D portfolio with scroll animations, light and dark themes and a one-click resume download.
