shoaibahmedsoomro.eu.cc

Sindh, Pakistan. Open to remote work and relocation.

Summary

IT infrastructure engineer with 7 years in IT. I keep servers and cloud systems running on Google Cloud and Linux, manage Microsoft 365 security settings, and build the Node.js, React and Python web apps that run on them. Based in Pakistan, working remotely for a real estate company in Dubai.

Skills

Infrastructure: Linux, Google Cloud (Compute Engine, Load Balancing), Microsoft 365, server monitoring, CI/CD, PM2

Languages: JavaScript, TypeScript, Python

Frontend: React, Next.js, responsive design, accessibility basics

Backend: Node.js, Express.js, REST APIs, JWT login, webhooks, Socket.IO

Data and services: MySQL / MariaDB, Stripe, PayPal, WhatsApp APIs, OpenAI and Gemini APIs

Experience

Asico Real Estate LLC

Dubai, UAE (Remote)

IT Infrastructure Engineer

Oct 2024 to Present

- Kept company web apps online on Google Cloud and Linux by using Compute Engine load balancing and PM2 process management.
- Built 2 internal tools: a WhatsApp Business CRM (Node.js, MySQL, live inbox, WhatsApp Cloud API) and an English and Arabic email signature generator.
- Added AI-assisted replies to the CRM with OpenAI and Gemini APIs while keeping responses fast and reliable.
- Manage Microsoft 365 compliance and threat-protection settings, backed by Microsoft 365 security training.

Self-employed

Sindh, Pakistan

Freelance Web Developer (Offline)

Mar 2024 to Sep 2024

- Delivered websites and web fixes for local clients by working with them directly, from request to handover.

Pak Affairs

Islamabad, Pakistan

Web Developer

Jan 2023 to Feb 2024

- Delivered web features end to end over 14 months, from the first version to live release.
- Made live systems more stable by refactoring code and fixing production bugs.

ACT Group (Wind Power Plant)

Thatta, Sindh, Pakistan

Remote Monitoring and Control Specialist

Jun 2020 to Dec 2022

- Monitored turbine operations remotely for 2.5 years by watching live data around the clock.
- Helped keep turbines available by spotting performance trends early and coordinating maintenance work.

Federal Investigation Agency (FIA), NR3C

Islamabad, Pakistan

Intern, Cyber Crime Wing

Sep 2019 to Nov 2019

- Tested web applications for security problems and helped sort small incidents during a 3-month internship.
- Learned the basics of threat research and malware analysis.

Selected Projects

ASICO WhatsApp Bot (Node.js, Express, MySQL, Socket.IO)

- A WhatsApp Business CRM that automates customer support, with a live inbox, workflows and AI-assisted replies.
- Connects to the WhatsApp Cloud API (webhooks) and WhatsApp Web sessions, with token-secured REST

endpoints.

RealEstateApp AE (Angular 17, TypeScript)

- A property management platform with an AI agent, WhatsApp automation, CRM and leasing.

PropertyApp Lite (JavaScript)

- Property management that covers the full leasing process for UAE real estate.

ASICO Signature Generator (HTML, CSS, JavaScript)

- An internal tool that creates branded email signatures in English and Arabic.

Interactive Resume (this portfolio) (React, Three.js, GSAP)

- A 3D portfolio with scroll animations, light and dark themes and a one-click resume download.

Education

University of Sindh

BS, Computer Science

Jan 2020 to Dec 2023

Certifications

- Google Cloud Skill Badge: Implement Load Balancing on Compute Engine
- ISO/IEC 27001 Information Security Associate
- Microsoft 365 compliance training (MS-102 learning path)
- Microsoft training: Defend Against Threats with Microsoft 365
- Python Essentials 1
